DETAILED ACTION

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Retaining Heating Strand on Mesh

Species A: representing the strand integral molded to the mesh (para 14, claim 4).

Species B: Fig. 6 and claim 6 representing the strand threaded or tied to the mesh.

Species C: representing the strand looped around protuberances on the mesh (claim 7).

Species D: Figs. 7 and 8, representing the strand attached to clips, with the clips retained in mesh holes.

Species E: Fig. 9, representing the strand attached to channels formed in the mesh.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims

Art Unit: 3635

subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Species A – claim 4
Species B – claims 5 and 6
Species C – claim 7
Species D – claim 8
Species E – claim 9

The following claims are generic: apparently none.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

The common technical feature is application of heat to a gutter screen. This cannot be a special technical feature under PCT Rule 13.2 because the element is shown in the prior art. US Patent 4308696 teaches such an element.
